5 things every business website needs

Check your website tonight. Five things it needs.

1. **Contact on every page**
   Phone and e-mail on every page.
2. **One page per product**
   One page for each product.
3. **Buyer questions, answered**
   The questions buyers ask, with your answers.
4. **Company facts, written clearly**
   Clear facts about your company.
5. **Your buyers' languages**
   The languages your buyers speak.

Three words you will hear

SEO: Google finds your page.

AEO: the short answer on top comes from your page.

GEO: ChatGPT and Gemini name your company.

Three names. One goal. Buyers find you.

> Nobody can promise you page one. Not Google. Not ChatGPT. Not me.
> AI can write your pages fast. But only you know your facts. So read every line before it goes online.
> The AI writes. You decide.

If you want help with your website or its pages, AI Employees does this work.
